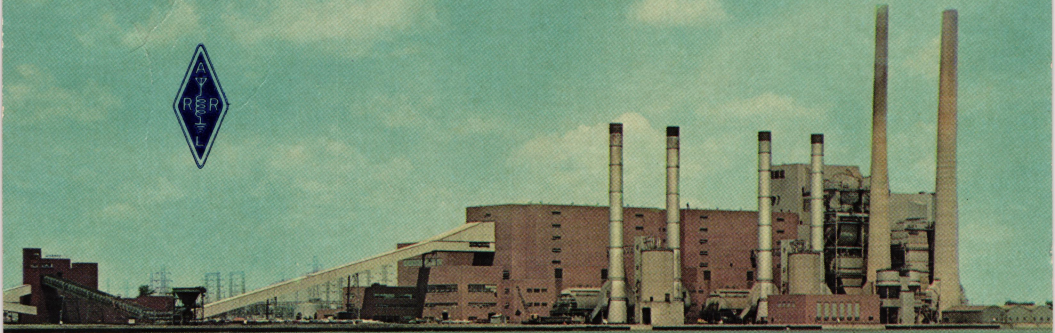
JAMES W. HEBERT



13500 Rutherford Detroit, Michigan U.S.A. 48227

The six turbine-generators in the **ST. CLAIR PLANT** can generate over 1,305,000 kilowatts - enough electricity for two million people. It's one of the largest coal-fired steam generating plants in the world. It is one of 7 inter-connected power plants which help 4,000,000 people in Southeastern Michigan Live Better Electrically.
